ABOUT ME

I am a dedicated Computer Engineer with a passion for creating software solutions that simplify people's lives. I made a career change into software development to pursue my passion for coding and problem-solving. My primary focus on crafting user-friendly websites and applications.

What sets me apart is my excellent communication skills, empathy, and adaptability.

In summary, I am a Computer Engineer with a deep enthusiasm for software development, committed to crafting practical and user-centric solutions that make life easier.

EXPERIENCE 💼

Software Developer
Oct 2023 - Present

Acumant / Stockholm - Remote

Key Responsibilities:
- Develop front-end components using JavaScript, React, CSS, and HTML.
- Optimize components for maximum performance across various devices and browsers.
- Contribute to the entire application lifecycle, focusing on coding and debugging.
- Troubleshoot and debug applications.
- Collaborate with cross-functional teams to define, design, and ship new features.

Frontend Developer - Intern
Sep 22 - Feb 23

Cubicl / Ankara-Remote

During this productive internship process, I contributed to my development by performing tasks in the following areas:

- Application Interface Design Fix
- Form Field Improvement
- Creating and Designing a New Page
- Fix bugs in the app

- This internship experience made a significant contribution to my better understanding of software development processes by providing me with the opportunity to successfully perform various tasks in real applications.
